Parent tip sheet

A quick guide before you print

What is a pattern?

A pattern is a repeating sequence. Kids learn to notice what comes next — a key early maths and thinking skill.

Pattern codes (say them aloud)

AB = two parts that take turns (circle, square, circle, square...)

AAB = two of A, then one B · ABB = one A, then two of B

ABC = three different parts in order · AABB = two A, then two B

How to use this pack

1. Start with AB complete-the-row pages (ages ~3–4).
2. Move to AAB / ABB / ABC / AABB when ready (~5–7).
3. Cut-and-paste pages build scissor skills — adult supervision recommended.
4. Create & name pages let kids invent and label their own patterns.

Helpful tips

- Clap or tap the pattern: “clap–stomp–clap–stomp”.
- Use toys or snacks to build the same pattern on the table.
- Ask: “What comes next?” before they draw or paste.
- B&W friendly — colour the shapes if you like, or leave as outlines.

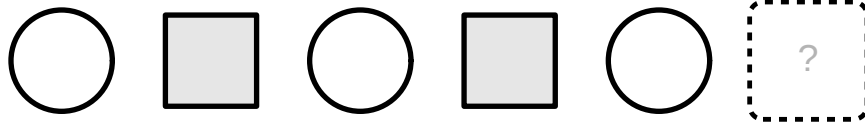

Answers & pacing

There is no answer key needed — patterns are visual. Celebrate attempts. One or two pages per sitting is plenty for young learners.

Complete the pattern — AB

Draw or colour the missing shape(s) · ages ~3–4

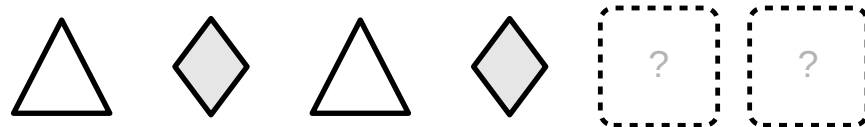

1. AB

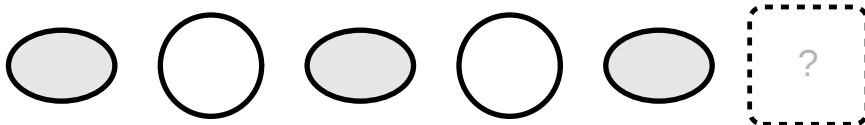

2. AB

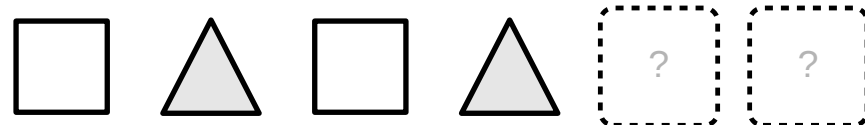

3. AB

4. AB

5. AB

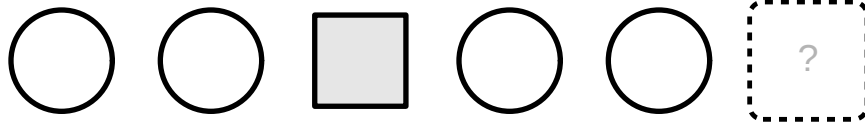

Say it aloud: A, B, A, B... What comes next?

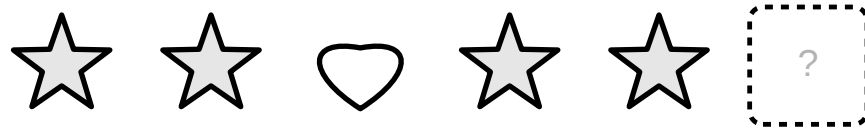

Complete the pattern — AAB & ABB

Two of one, then one of the other · ages ~4–6

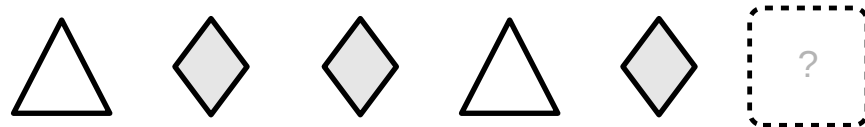

1. AAB

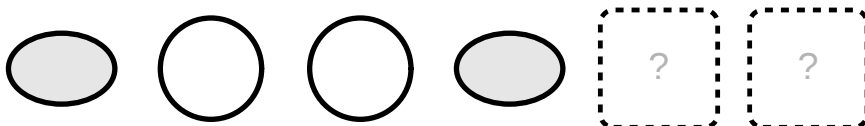

2. AAB

3. ABB

4. ABB

5. AAB

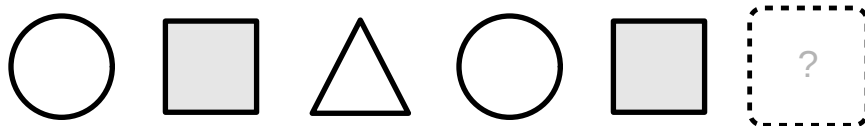

AAB = two A then B · ABB = one A then two B

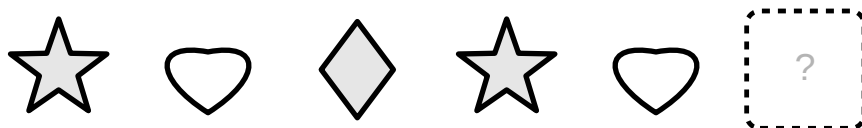

Complete the pattern — ABC

Three different shapes in order · ages ~5–7

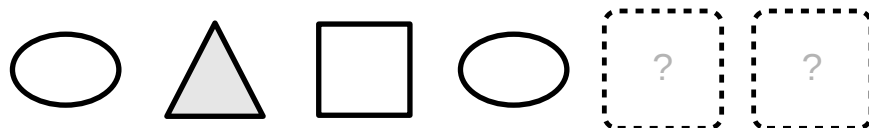

1. ABC

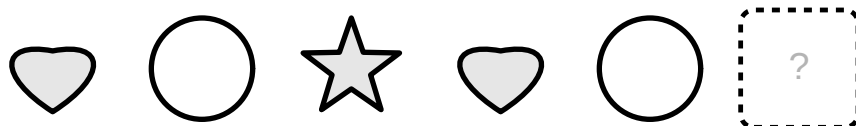

2. ABC

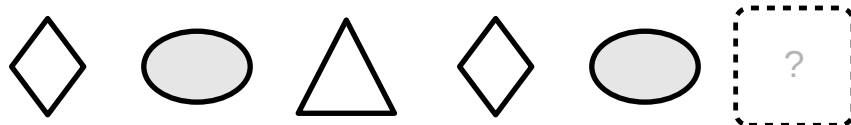

3. ABC

4. ABC

5. ABC

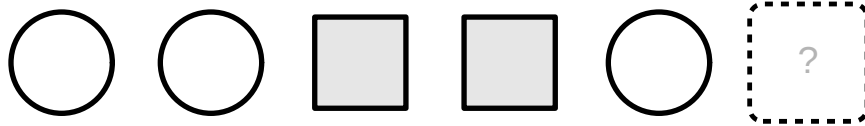

Say: A, B, C, A, B, C... What comes next?

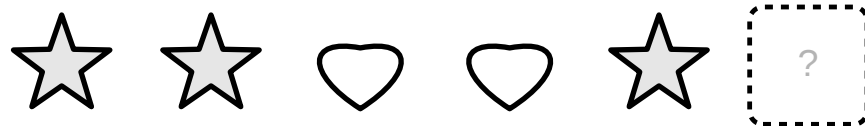

Complete the pattern — AABB

Two and two · ages ~5–7

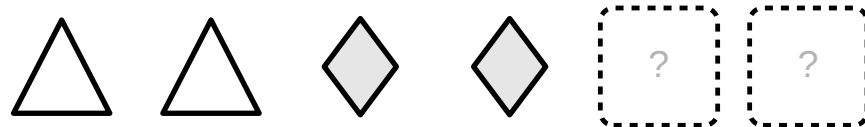

1. AABB

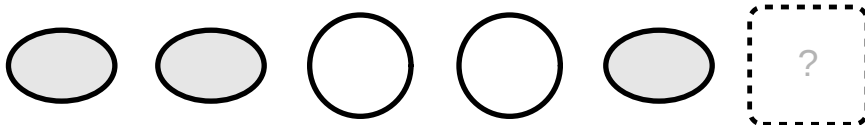

2. AABB

3. AABB

4. AABB

5. AABB

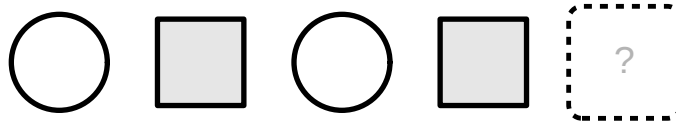

AABB = two A, then two B — keep the pairs going!

Cut & paste — complete AB

Cut out the shapes below · paste into the ? boxes

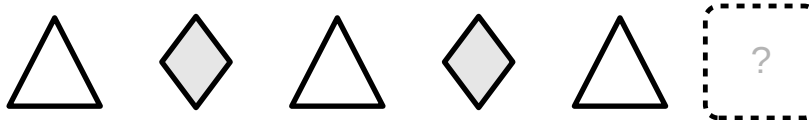

1. AB

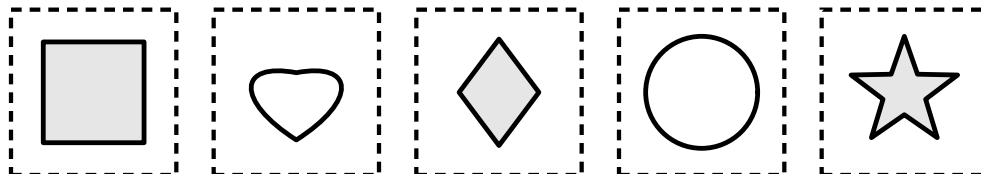

2. AB

3. AB

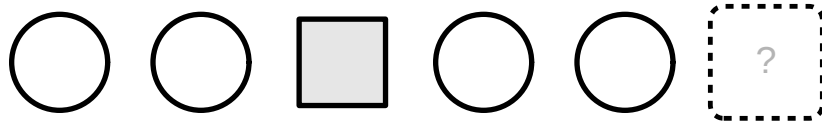

Cut on the dashed lines · paste to finish each pattern

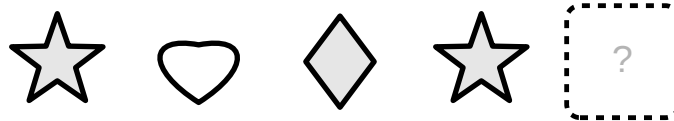

Cut & paste — AAB · ABC · AAB

Cut out the shapes · paste to finish each pattern

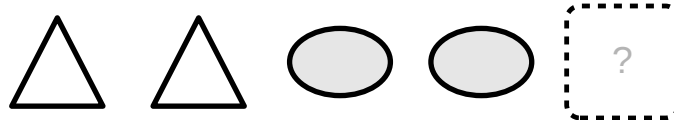

1. AAB

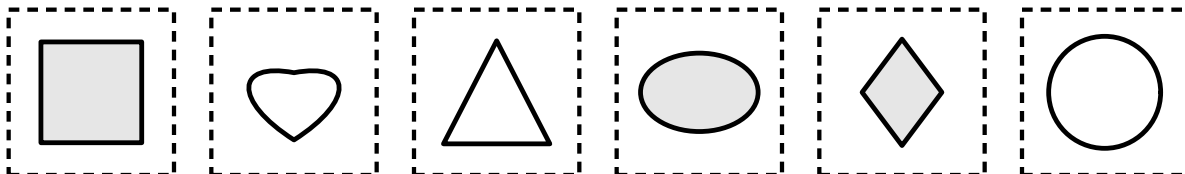

2. ABC

3. AAB

Cut on the dashed lines · paste to finish each pattern

Create your own patterns

Draw shapes in the boxes · invent AB, AAB, ABC, or AABB

Ideas to draw:
